Objective

Motivated and fast-learning aspiring Full-Stack Developer with a strong foundation in [programming languages, frameworks, or technologies you know, e.g.JavaScript, React, etc.]. Seeking an entry-level opportunity in a dynamic and professional environment to apply my skills in software development, web design, and database management. Dedicated to contributing to the success of the organization by delivering scalable, efficient, and user-focused solutions.

Project

Web Developer Portfolio

Developed a responsive single-page portfolio using HTML and CSS to showcase projects, skills, and contact information. Optimized for cross-device compatibility by implementing modern responsive design techniques.

Interactive Movie Ticket Booking Website

Developed a feature-rich movie ticket booking website using React.js, SCSS, HTML, and JSON Server. Implemented responsive UI components with SCSS for a modern design and ensured smooth interaction with the backend using JSON Server for data management

Certification

Java Programming

Completed a comprehensive course by MKCL through Sai Computer, earning a Certificate of Appreciation for outstanding
